hosted sharepoint service 3.0

Proximitum's Hosted SharePoint Service 3.0 is a web-based collaboration and document management service that allows you to centrally store, manage and collaborate on shared documents. Organisations are able to create and manage their own collaborative web sites and services. You can ensure integrity of content; record version history; and manage access and security.

Proximitum's Hosted SharePoint Service 3.0 helps teams stay connected and productive by providing easy access to the people, documents, and information they need to make more informed decisions and get the job done. It provides a single workspace for teams to coordinate schedules, organise documents, and participate in discussions from the office, at home or on the move.

Benefits of Proximitum's Hosted SharePoint Service 3.0

Improve team productivity with easy-to-use collaborative tools

Connect people with the information and resources they need. Users can create team workspaces, coordinate calendars, organise documents, and receive important notifications including announcements and alerts.

Easily manage documents and help ensure integrity of content

With enhanced document management capabilities including the option to activate document checkout before editing, view revisions to documents, restore to previous versions, and the control to set document- and item-level security, Windows SharePoint Services can help ensure the integrity of documents stored on team sites.

Get users up to speed quickly

User interface improvements in Windows SharePoint Services 3.0 include enhanced views and menus that simplify navigation within and among SharePoint sites. Integration with familiar productivity tools, including programs in the Microsoft Office suite, makes it easy for users to get up to speed quickly.

Deploy solutions tailored to your business processes

While standard workspaces in Windows SharePoint Services 3.0 are easy to implement, organisations seeking a more customised deployment can get started quickly with application templates for addressing specific business processes.

Build a collaboration environment quickly and easily

Easy to manage and scale, Windows SharePoint Services 3.0 enables IT departments to deploy a collaborative environment with minimal administrative time and effort. Deployment settings can be flexibly changed, resulting in less pre-planning allowing companies to get started even faster.

Reduce the complexity of securing business information

Windows SharePoint Services 3.0 provides IT with advanced administrative controls for increasing the security of information resources, while decreasing cost and complexity associated with site provisioning, site management, and support.

Provide sophisticated controls for securing company resources

IT departments can now set permissions as deep down as the document or item level. IT can set top-down policies for better content recovery and users, groups, and team workspace site administration.

Take file sharing to a new level with robust storage capabilities

Windows SharePoint Services 3.0 supplies workspaces with document storage and retrieval features, including check-in/check-out functionality, version history, custom metadata, and customisable views.

Provide a cost-effective foundation for building Web-based applications

Windows SharePoint Services 3.0 exposes a common framework for document management and collaboration from which flexible and scalable Web applications and Internet sites, specific to the needs of the organisation, can be built.

Act Now!

It's easy to get started...

Proximitum Hosted Services mean that there are no installation worries or set-up headaches.

We will consult with you to establish exactly what you require from the solution and will configure the software accordingly.

Proximitum is a Microsoft Gold Partner who provision tailored Managed IT Services. Proximitum deliver a reliable hosting platform, tailored hosted applications and outstanding service. We ensure that your business applications are secure, protected and always available.
